

Local availability of phenol and acetone is expected to boost the production of derivatives and downstream products, which will expand the overall market in the country.

We are currently evaluating the possibilities to develop world-class facilities for upstream & downstream integration.

---

**Bisphenol A**

Used in Epoxy Resins

---

**Caprolactam**

Used in packaging, clothing, carpets

---

**Cyclohexanone**

Used in Nylon 6 fiber, EP / film

---

**Polycarbonate**

Used in automobile, construction, electronics

---

**Diacetone Alcohol**

Used in paint industry

---

**Isophorone**

Used in printing & disinfectant, fertilisers / pesticides

---

**Methyl Isobutyl Ketone**

Used in paints & coatings, rubber solvent, adhesive

---

**Methyl Isobutyl Carbinol**

Used in lubricant additives

---

**Methyl Methacrylate**

Used in automobile industry, construction
